

# FULL SPEC LIVE RESIN CONCENTRATES

SUGAR, BADDER, SHATTER & CRUMBLE

LIVE RESIN SUGAR

LIVE RESIN BADDER

LIVE RESIN CRUMBLE

LIVE RESIN SHATTER

Our concentrate line of Live Resin Sugar, Live Resin Badder, Live Resin Crumble, and Live Resin Shatter make up the most unique, boutique Full Spec Live Resin experience.

Each one of these concentrate forms comes with their own signature allure - the glimmering microcrystals in the Sugar, the mouth-watering juiciness of the Badder, the captivating translucence of the Shatter, and the pliable ease of the Crumble.

These concentrates are painstakingly made in limited batches from a selective number of strains. Each run is unique, and offers its own signature experience.

Our selected strains are cultivated and nurtured until harvest, at which time they are immediately frozen at temperatures as low as -80° F to retain their highly prized characteristics.

This fresh frozen cannabis must then be extracted with great care at ultra low temperatures (-70° F to -100° F) in an effort to preserve all the signature cannabinoids, terpenes, and compounds of each strain.

**Extraction Type:** High Terpene Full Spectrum BHO

**Extracted From:** Fresh Frozen Full Spec Flower

**Flavor:** Cannabis Derived Terpenes

## The Variety of Live Resin

With four different forms to choose from, the Concentrate line showcases the variety that Live Resin extraction offers. With these different forms, dabbing enthusiasts can compare, contrast and find a new favorite.

## Extracted from Fresh Frozen Flower to Lock In Fresh Flavor

Immediately after harvest, our Full Spec flower is fresh frozen and extracted at temperatures as low as -100° F. This locks in the fresh aromas and flavors of each flowering plant, and preserves the entire full spectrum of cannabis compounds.

## Full Spectrum High Terpene Extraction

By maximizing the preserved spectrum of cannabinoids & terpenes, Live Resin concentrates deliver a sustained entourage effects along with signature dab potency.

## Terpene-Focused Fulfillment

Shipped in coolers and packaged to minimize light degradation, we work to ensure these concentrates remain fresh all the way to your dab rig.
